

Leaf Bio Laundry Detergent Sheet — Usage Guide

Laundry: machine wash and hand wash

1 sheet = 1 wash

Standard machine load. Half a sheet for hand washing one or two items. Dissolves fully from 20 °C to 90 °C.

AT A GLANCE

1 Dry hands, take a sheet

Remove one sheet with dry hands. Reseal the pack.

2 Sheet in the drum

Place the sheet flat at the bottom of the empty drum — not the drawer.

3 Load laundry

Load on top of the sheet. Don't overload — leave a hand's width of space.

4 Select any cycle

20–90 °C, per garment care labels. No extra detergent needed.

5 Run the wash

The sheet dissolves fully as water enters — no residue.

6 Done

Dry as per care labels. Store the pack sealed, cool and dry.

PREPARATION

1

Ensure hands are clean and fully dry before handling sheets — moisture will begin dissolving the sheet¹.

2

Remove the required number of sheets from the pack and reseal the packaging immediately to protect remaining sheets from moisture. 1 sheet = 1 wash².

APPLICATION — MACHINE WASH

3

Place the sheet flat at the bottom of the empty drum. Do not place the sheet in the detergent drawer.

4

Load the laundry on top of the sheet. Do not overload the drum — leave a hand's width of space at the top for effective circulation.

5

Select the cycle appropriate to the fabrics, following garment care labels. The sheet dissolves fully at any wash temperature from 20 °C to 90 °C³

6

Run the wash. No rinse aid or additional detergent is required.

APPLICATION — HAND WASH

7

Fill a bowl or basin with water at 20 °C or above. Add half a sheet and agitate gently until fully dissolved.

8

Add the garments and wash by hand. Stubborn soiling may require longer soaking or repeated agitation.

9

Rinse thoroughly with clean water until no suds remain, then dry as per garment care labels.

DISPOSAL & STORAGE

10

Dispose of used hand-wash solution down a sink or drain. There is no chemical container to dispose of.

11

Recycle the cardboard packaging once empty.

12

Store remaining sheets in the tightly closed original packaging in a cool, dry location, protected from sunlight and out of reach of children.

1 Avoid contact with skin and eyes; wash hands after handling. Refer to the SDS for full handling guidance.

2 Using more sheets than needed generates unnecessary waste and may lead to greater than expected foaming; this should be avoided.

3 The bio formulation contains enzymes. For wool, silk and other delicate fabrics, or for very sensitive skin, use the Leaf Non-Bio sheet.

ADDITIONAL INFORMATION

Leaf bio sheets are a laundry detergent and are designed for washing textiles only. Do not use for surface cleaning or dishwashing — dedicated Leaf sheet products exist for those applications.

For professional and workplace settings, COSHH regulations may require an assessment of substances in use. The safety data sheet (SDS) and this usage guide assist the end user in completing a COSHH assessment. SDS available from info@washwithleaf.com.
